

GOLLA NANDA KUMAR

DevSecOps Engineer | AWS | Kubernetes | Terraform | CI/CD | Cloud Security

Hyderabad, India | +91-7989853252 | nandagolla074@gmail.com | <http://www.linkedin.com/in/golla-nandakumar-17a8961ab> | github.com/nandagolla1

SUMMARY

DevSecOps Engineer with 4+ years at Tata Consultancy Services building secure, highly available AWS cloud-native platforms for global enterprise clients. Expert in Kubernetes (EKS), Terraform IaC, and security-integrated CI/CD with Jenkins, Argo CD, and GitHub Actions. Delivered 90%+ vulnerability mitigation across 15+ microservices, 40% faster release velocity, and 99.9% production uptime by embedding SAST, DAST, SonarQube, and ECR image scanning. AWS Certified Solutions Architect – Associate (SAA-C03) and Cloud Practitioner (CLF-C02).

SKILLS

Cloud & AWS: EC2, VPC, IAM, S3, EBS, EFS, EKS, Route53, ALB, NLB, ASG, Lambda, API Gateway, CloudWatch, CloudTrail, KMS, Cost Optimization

Infrastructure as Code: Terraform (modules, remote state, workspaces, S3 backend, DynamoDB locking), Ansible

CI/CD & GitOps: Jenkins, Argo CD, GitHub Actions, GitOps, Continuous Integration, Continuous Delivery, Continuous Deployment, Pipeline Automation

Containers & Orchestration: Docker, Kubernetes (K8s), Amazon EKS, Helm, Ingress, RBAC, StatefulSets, HPA, DaemonSets, Zero-Downtime Deployments

DevSecOps & Security: SAST, DAST, SonarQube, ECR Image Scanning, OWASP, Shift-Left Security, HashiCorp Vault, AWS Secrets Manager, SSM Parameter Store, KMS, IAM, Vulnerability Management

Monitoring & Observability: Prometheus, Grafana, Alertmanager, ELK Stack (Elasticsearch, Logstash, Kibana), CloudWatch, Log Aggregation, Incident Management

Scripting & Automation: Bash, Python, Shell Scripting

Tools & Platforms: Git, GitHub, Nexus, AWS ECR, Docker Hub, Maven, npm, pip, Linux (RHEL, Ubuntu, CentOS)

WORK EXPERIENCE

DevSecOps Engineer | Tata Consultancy Services (TCS) – Hasbro US

Jan 2024 – Present

Hyderabad, India | Consumer Products Platform – CI/CD, Security & Observability

- Engineered end-to-end Jenkins CI/CD architecture for 15+ microservices on AWS EKS with enforced quality gates and parallel execution, accelerating release velocity by 40% while improving deployment reliability.
- Spearheaded integration of SAST, DAST, SonarQube, dependency checks, and ECR image scanning into all CI/CD pipelines, remediating 150+ vulnerabilities and achieving a 90%+ vulnerability mitigation rate.
- Implemented GitOps workflows with Argo CD for declarative Kubernetes deployments and self-healing rollbacks across dev, staging, and production, eliminating manual deployment errors and reducing configuration drift to zero.
- Orchestrated containerized workloads on AWS EKS using **Docker, Kubernetes, and Helm** with RBAC, Ingress, StatefulSets, and HPA configurations, sustaining 99.9% service availability and full SLA compliance. Overhauled secrets management for 15+ microservices using AWS Secrets Manager and HashiCorp Vault with policy-driven rotation, eliminating all hardcoded credentials across the platform.
- Launched Prometheus, Grafana, and Alertmanager alongside ELK-based log aggregation for 15+ services, slashing MTTD and MTTR by 40% and enabling real-time root-cause analysis.
- Scripted recurring operational workflows in AWS Lambda and secured API traffic via Amazon API Gateway, cutting manual overhead by 30% and maintaining zero critical security incidents over 6 consecutive months.

DevOps Engineer | Tata Consultancy Services (TCS) – ALDI Germany

Feb 2022 – Dec 2023

Hyderabad, India | Retail Platform – AWS Infrastructure & Security

- Designed and governed scalable multi-environment AWS infrastructure (dev/test/prod) using Terraform and Ansible, supporting 20+ production workloads aligned to the AWS Well-Architected Framework.
- Built reusable Terraform modules with S3 remote state and DynamoDB locking, cutting configuration drift by 70% and reducing environment provisioning time by 60%, directly accelerating application onboarding.

- Provisioned and managed AWS EC2, VPC, IAM, S3, EBS, EFS, Route53, ALB, NLB, ASG, and EKS clusters for a high-availability retail platform, sustaining 99.95% uptime across 20+ production workloads.
- Hardened platform security by safeguarding 100+ secrets in AWS Secrets Manager and SSM Parameter Store, enforcing KMS encryption across all S3 and EBS volumes, and enabling CloudTrail for audit compliance.
- Configured Ansible role-based playbooks to manage OS patching and configuration for 150+ Linux servers (RHEL/Ubuntu/CentOS), reducing manual effort by 40% and improving MTTR by 35% through CloudWatch alarm-driven incident response.
- Developed Bash and Python scripts for automated backups, health checks, log rotation, and alerting, eliminating 40% of recurring manual operational tasks; served as primary point of contact for AWS infrastructure and production support.

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate (SAA-C03)
- AWS Certified Cloud Practitioner (CLF-C02)

EDUCATION

Bachelor of Technology – Mechanical Engineering

JNTU Kakinada | CGPA: 7.4 / 10.0

Aug 2018 – May 2021

Diploma – Mechanical Engineering

Sri Vasavi Engineering College | Score: 76.4%

Jun 2015 – Apr 2018

LANGUAGES

English (Professional Working Proficiency) | **Telugu** (Native)
